

Cargo

Duration: 5 days

Short description:

Course intended for personnel involved in over site responsibility for the handling of cargo and mail. It provides information on the purpose and intent of existing security measures, the implementation of appropriate security controls for cargo consignments, and the appropriate emergency response procedures in the event of a cargo security incident.

Course objectives:

Enable selected personnel to:

- appreciate the origin and purpose of security measures and procedures necessary for the protection of cargo, courier/express parcels, mail and operators' supplies;
- understand the nature of the threat posed to aircraft by explosives and other dangerous substances;
- apply appropriate security controls to cargo consignments;
- inspect, screen or search consignments in accordance with prescribed security principles;
- ensure that all cargo facilities, vehicles, containers and equipment are subject to security control; and
- apply proper response action to an airline security emergency related to suspect cargo.

Target population:

This training is to be given in whole or in part to persons having over sight responsibility for the implementation of security measures related to the accepting, documenting and handling of cargo, courier/express parcels, mail and operators supplies, so that there are processes and procedures for ensuring that appropriate security preventive measures are applied in accordance with approved aviation security programmes.

Entry requirements:

Trainees should satisfy the following criteria:

- have written and oral command of the language of instruction;
- have oversight responsibility as it pertains to cargo security related to the handling, acceptance and/or documenting the implementation of cargo security measures within organizations mentioned in the target population.
