

# National Inspectors

**Duration: 7 days**

## Short description:

Course providing trainees with theoretical and practical knowledge of fundamental aspects of the audits and inspections as a part of a National Quality Control system. Trainees are provided with a standard methodology as well as specific techniques. The course is concluded by an exercise conducted at the airport.

## Course objectives:

Enable selected personnel to:

- define aviation security audits and inspections;
- determine the duties and specific skills required by an inspector;
- determine the appropriate methodology necessary to conduct security inspections within the scope of a National Aviation Security Quality Control system;
- prepare for, conduct, and present findings related to an aviation security inspection within the context of an exercise.

## Target population:

Management, supervisors and personnel involved in the assessment of the implementation of aviation security measures, including the:

- State's Appropriate Authority for Aviation Security involved in the regulatory activities and implementation oversight of aviation security;
- Air operators;
- Aviation security services providers;
- Airport operators;
- Other government or industry elements directly involved;
- Any personnel involved in the development/update of a National Civil Aviation Security Quality Control Programme.

## Entry requirements:

Trainees should satisfy the following criteria:

- have written and oral command of the language of instruction;
- at least three (3) years of operational experience in a position within organizations mentioned in the target population;
- persons who will have direct involvement in the implementation of a quality control programme
- it is desirable that trainees should have attended the National Quality Control Programme Workshop a specialized aviation security management course.
